

## HOW TO USE THIS GUIDE

This guide provides maps, travel tips and checklists to help you enjoy a safe, informed trip. It is best to use it in tandem with the detailed Water Recreational River Maps from the Delaware River Basin Commission (DRBC). You'll find an order form for these maps at the River Store.

There are two types of maps in this guide:

**RIVER MAPS** - The full-color river maps with corresponding text page give you an overview of a particular stretch of the river. On these maps are noted areas of caution, dams, landings, and points of interest.

**LANDING MAPS** - In the text part of the river maps, landings are referenced with a number. When you click on a Landing's name or number, you are taken to a detailed Landing page. These maps help you find the landing, and facilities, if available.
